Cambridge International Advanced Subsidiary and Advanced Level

## MARK SCHEME for the May/June 2015 series

## 9700 BIOLOGY

9700/34

Paper 3 (Advanced Practical Skills 2), maximum raw mark 40

This mark scheme is published as an aid to teachers and candidates, to indicate the requirements of the examination. It shows the basis on which Examiners were instructed to award marks. It does not indicate the details of the discussions that took place at an Examiners' meeting before marking began, which would have considered the acceptability of alternative answers.

Mark schemes should be read in conjunction with the question paper and the Principal Examiner Report for Teachers.

Cambridge will not enter into discussions about these mark schemes.

Cambridge is publishing the mark schemes for the May/June 2015 series for most Cambridge IGCSE<sup>®</sup>, Cambridge International A and AS Level components and some Cambridge O Level components.

® IGCSE is the registered trademark of Cambridge International Examinations.

Pa	age 3	Mark Scheme	Syllabus	Paper
		Cambridge International AS/A Level – May/June 2015	9700	34
1	<b>(a)</b> lev	vel of risk) medium or high ;		[1]
	(b) (i)	(labels under correct sequence of beakers) 0.03 + 0.003 + 0.0003	+ % ;	
		shows transfer of $1  \text{cm}^3$ of solution from previous beaker to 2 beakers ;		
		adds $9  \text{cm}^3$ water/ <b>W</b> to three beakers ;		[3]
	(ii)	1 table with heading + percentage concentration of X;		
		2 table with heading + <u>number or no. of bubbles</u> ;		
		<b>3</b> records results for <b>W or</b> 0% and 4 concentrations ;		
		4 records lowest concentration of X with a higher number of bubl concentration of X ;	bles than hi	ghest
		<b>5</b> repeats at least one concentration ;		[5]
	(iii)	whole seconds recorded and shows 2 divided by this value ;		
		correct answer calculated to correct number of significant figures ;		[2]
	(iv)	<i>idea of</i> inhibits activity ;		
		<i>idea of</i> preventing substrate binding to the enzyme/active site <b>or</b> f substrate complexes formed ;	ewer enzyn	ne- [2]
	(v)	(counting bubbles) different sizes <b>or</b> too fast <b>or</b> bubbles group toge	ther;	
		(displacement of water) gas escapes from delivery tube <b>or</b> not all b syringe <b>or</b> parallax error ;	ubbles go ir	nto [2]
	(vi)	(independent variable) use the same concentration of ${\boldsymbol X}$ ;		
		5 or more temperatures ;		
		use thermostatically-controlled water-bath ;		[3]
				[Total: 18]

2	(a)	(i)	orientation (x-axis) length of neck/cm + (y-axis) thickness of muscle wall	in left ventricle/	nm ;	
			<i>scale</i> ( <i>x</i> -axis) 2 cm to 10 labelled each 2 cm + must have 50 at the c 5 labelled each 2 cm, + must have 20 at origin ;	origin + ( <i>y</i> -axis) 2	cm to	
			plotting correct plotting of 5 points ;			
			<i>line</i> 5 plots with ruled lines exactly point to point <b>or</b> line of best fit than 1 mm thick ;	+ quality smooth	line less [4]	
		(ii)	correct estimate from candidate graph;		[1]	
		(iii)	<i>idea of</i> thicker/stronger/wall or muscle to push blood up long blood further;	er neck <b>or</b> to pus	sh the [1]	
	(b)	(i)	1 correct selection of vessel <b>Q</b> or <b>T</b> ;			
			<b>2</b> size at least 100 mm <b>+</b> no shading ;			
			3 length of drawing is at least twice the size of the narrowe	st width ;		
			4 draws at least three lines across wall + inner line crinkled	l;		
			<b>5</b> proportions of vessel walls correct with one selected ;		[5]	
		(ii)	1 shows on Fig. 2.1 where measured <b>S</b> ;			
			2 shows at least 5 of measurements of the diameter + 5 me thickness of the wall ;	easurements of tl	ıe	
			3 measures at least 3 for each in whole mm or to $\pm 0.5$ mm	• ን		
			4 answer shown as larger number to smaller number to low	vest common der	iominator ; [4]	
	(c)	(i)	1 sharp continuous lines + size at least 40 mm for at least c	one cell ;		
			<b>2</b> draws only 4 xylem vessels <b>+</b> at least 2 touching ;			
			<b>3</b> for at least 2 cells, walls drawn as double lines, with mide	lle lamella ;		
			4 straight line where 2 cells meet <b>or</b> at least one cell with a	t least one angle	present ;	
			<b>5</b> correct label with label line ending in the lumen ;		[5]	
		(ii)	xylem has only one ;			
		(iii)
