## UNIVERSITY OF CAMBRIDGE INTERNATIONAL EXAMINATIONS

GCE Advanced Subsidiary Level and GCE Advanced Level

## MARK SCHEME for the May/June 2012 question paper for the guidance of teachers

## 9702 PHYSICS

9702/21

Paper 2 (AS Structured Questions), maximum raw mark 60

This mark scheme is published as an aid to teachers and candidates, to indicate the requirements of the examination. It shows the basis on which Examiners were instructed to award marks. It does not indicate the details of the discussions that took place at an Examiners' meeting before marking began, which would have considered the acceptability of alternative answers.

Mark schemes must be read in conjunction with the question papers and the report on the examination.

• Cambridge will not enter into discussions or correspondence in connection with these mark schemes.

Cambridge is publishing the mark schemes for the May/June 2012 question papers for most IGCSE, GCE Advanced Level and Advanced Subsidiary Level syllabuses and some Ordinary Level syllabuses.

			GCE AS/A LEVEL – May/June 2012	9702	21

			GCE AS/A LEVEL – May/June 2012 9702		21	
	(c) (i)		oke's law: extension is proportional to the force (not masear/straight line graph hence obeys Hooke's law	ss)	B1 B1	[2]
	(ii)	K =	of the gradient ( <i>not just F = kx</i> ) = (0.4 × 9.8) / 15 × 10 <sup>-2</sup> = 26(.1) N m <sup>-1</sup>		C1 M1 A0	[2]
	(iii)	eithe	er energy = area to left of line or energy = $\frac{1}{2} ke^2$ = $\frac{1}{2} \times [(0.4 \times 9.8) / 15 \times 10^{-2}] \times (15 \times 10^{-2})^2$ = 0.294 J (allow 2 s.f.)	2	C1 C1 A1	[3]
4	(a) (i)		$V^2 / P$ or $P = IV$ and $V = IR$ = $(220)^2 / 2500$		C1	
			= 19.4 Ω (allow 2 s.f.)		A1	[2]
	(ii)	1 =	$\rho l / A$ = $[19.4 \times 2.0 \times 10^{-7}] / 1.1 \times 10^{-6}$ = $3.53$ m (allow 2 s.f.)		C1 C1 A1	[3]
	(b) (i)	P =	625, 620 or 630 W		A1	[1]
	(ii)	Eith	eeds to be reduced er length ¼ of original length		C1	
			rea 4× greater iameter 2× greater		A1	[2]
5	(a) (i)	sum	of e.m.f.'s = sum of p.d.'s around a loop/circuit		B1	[1]
	(ii)	ene	rgy		B1	[1]
	(b) (i)	I = 0	= I × (4.0 + 2.5 + 0.5) 0.286 A (allow 2 s.f.) otal resistance is not 7Ω, 0/2 marks)		C1 A1	[2]
	(ii)	V =	[0.90 / 1.0] × 4 (= 3.6) I R = 0.286 × 3.6 = 1.03 V actor of 0.9 not used, then 0/2 marks)		C1 A1	[2]
	(iii)	E=	1.03 V		A1	[1]
	(iv)	eithe or	er no current through cell B p.d. across r is zero		B1	[1]
6	(a) (i)	cohe	erence: constant phase difference between (two) waves		M1 A1	[2]
	(ii)		n difference is either $\lambda$ or $n\lambda$ hase difference is 360° or $n \times$ 360° or $n2\pi$ rad		B1	[1]

	Page 4	Mark Scheme: Teachers' version	Syllabus	Paper	
		GCE AS/A LEVEL – May/June 2012	9702	21	
		th difference is either $\lambda/2$ or $(n + \frac{1}{2}) \lambda$ phase difference is odd multiple of either 180° or $\pi$ rad		B1	[1]
		= $\lambda D / a$ = $[630 \times 10^{-9} \times 1.5] / 0.45 \times 10^{-3}$ = $2.1 \times 10^{-3}$ m		C1 C1 A1	[3]
	no chai	nge to <u>dark</u> fringes nge to separation/fringe width ringes are brighter/lighter/more intense		B1 B1 B1	[3]
7	(a) (i) 2 p	protons and 2 neutrons		B1	[1]
	ma cor ab ( <i>no</i> <u>hig</u> de	i. positively charged 2e uss 4u instant energy sorbed by thin paper <i>or</i> few cm of air (3 cm → 8 cm) of low penetration) hly ionizing flected in electric/magnetic fields the mark for each property, max 2)		B2	[2]
	differer energy	nergy is conserved ace in mass 'changed' into a form of energy in the form of kinetic energy of the products / γ-radiation s / e.m. radiation		B1 B1	[3]
