UNIVERSITY OF CAMBRIDGE INTERNATIONAL EXAMINATIONS

GCE Advanced Subsidiary Level and GCE Advanced Level

MARK SCHEME for the May/June 2012 question paper for the guidance of teachers

9702 PHYSICS

9702/35

Paper 3 (Advanced Practical Skills 1), maximum raw mark 40

This mark scheme is published as an aid to teachers and candidates, to indicate the requirements of the examination. It shows the basis on which Examiners were instructed to award marks. It does not indicate the details of the discussions that took place at an Examiners' meeting before marking began, which would have considered the acceptability of alternative answers.

Mark schemes must be read in conjunction with the question papers and the report on the examination.

• Cambridge will not enter into discussions or correspondence in connection with these mark schemes.

Cambridge is publishing the mark schemes for the May/June 2012 question papers for most IGCSE, GCE Advanced Level and Advanced Subsidiary Level syllabuses and some Ordinary Level syllabuses.

Page 2		Mark Scheme: Teachers' version	Syllabus	Paper	
		GCE AS/A LEVEL – May/June 2012	9702	35	
l (b) ((ii) A	Ammeter reading with unit, in range 1 mA $< I <$ 1 A. Mus	t see $n = 3$.	[1]	
. ,	Six sets of readings of I and n scores 5 marks, five sets scores 4 marks etc. Incorrect trend then -1 . Correct trend is I decreases as n increases.				
	Majo	r help from Supervisor –2. Minor help from Supervisor –	1.	[5]	
	Rang	ge of 6 or 7.		[1]	
	Each	mn heading: column heading must contain a quantity and a unit whe unit must conform to accepted scientific convention e.g. <i>I</i>		[1] $n + 1/I/A^{-1}$.	
	Consistency: All values of I must be given to the nearest 0.1 mA or better.			[1]	
	Signi	ficant figures: ficant figures for every row of values of $(n + 1) / I$ same corded in the table.	e as or one greater	[1] than s.f. in <i>I,</i>	
		ulation: es of $(n + 1) / I$ calculated correctly.		[1]	
(d)	i	Axes: Sensible scales must be used, no awkward scales (e.g. Scales must be chosen so that the plotted points must on both <i>x</i> and <i>y</i> directions. Scales must be labelled with the quantity that is being places are mustings must be no more than 3 large squares a	otted.	[1] the graph grid	
	<i>[</i>	Plotting of points: All observations in the table must be plotted. Diameter of plots must be ≤ half a small square (no 'blob Work to an accuracy of half a small square.	s').	[1]	
	t	Quality: Judge by scatter of all points about best fit line. All point his mark to be scored. At least 5 plots needed. All points must be within 0.2 of <i>n</i> from a best line.	s in the table must	[1] be plotted for	
(`	Line of best fit: Judge by balance of all points on the grid about the cand There must be an even distribution of points either side of Allow one anomalous point only if clearly indicated by the Line must not be kinked or thicker than half a small squa	of the line along the candidate.	• ,	
(i	í T	Gradient: The hypotenuse of the triangle must be at least half the I Both read-offs must be accurate to half a small square in Do not allow $\Delta x / \Delta y$.	•

			GCE AS/A LEVEL – May/June 2012	9702	35
		Eithe Chec Read Or:	ercept: er: ck correct read off from a point on the line and substitu d off must be accurate to half a small square in both <i>x</i> ck read-off of intercept directly from the graph.	_	[1] · c.
	` '		P = candidate's gradient. Value of Q = candidate's intellow fractions.	ercept.	[1]
	(f) Val	ue of	V in range $1V \le V \le 2V$.		[1]
	(g) R w	vith ap	opropriate unit Ω or VA ⁻¹ . Expect 50Ω or $0.05\mathrm{VmA^{-1}}$ or	or 0.05 kΩ	[1]
					[Total: 20]
2	(b) (ii)	Valu	e of x with unit to the nearest mm in range: $40.0 \text{ cm} \le$	<i>x</i> ≤ 60.0 cm.	[1]
	(c) (ii)	Valu	e of x_1 with consistent unit.		[1]
	(iii)	Corr	ect calculation of d_1 with unit.		[1]
	(iv)	If re	plute uncertainty in d_1 in range 2 – 5 mm. peated readings have been taken, then the absolut e. Correct method shown to find the percentage uncer	•	[1] n be half the
	(d) (ii)	Valu	e of x_2 .		[1]
	(e) (iii)		e of 1 s < T < 4 s. ence of repeats.		[1] [1]
	` '		value of <i>T</i> . value of <i>T</i> < first value of <i>T</i> .		[1] [1]
	(g) (i)	Two	values of <i>k</i> calculated correctly.		[1]
	(ii)	Justi	ification of sf in k linked to significant figures in d and 7	<u>.</u>	[1]
	(iii)		sible comment relating to the calculated values of cified by the candidate.	k, testing again	st a criterion [1]

	GCE AS/A LEVEL – May/June 2012	9702	35

(h)

	(i) Limitations 4 max.	(ii) Improvements 4 max.	No credit/not enough
A	two results not enough	take more readings with discs of other materials / mass and plot a graph/ calculate more k values and compare	repeat readings few readings
В	reason why difficult to record/ measure x_2/x_1 directly	use a taller /narrower shape take measurement to each end and average/ hole in middle to see x_1/x_2 / hang masses with string	
С	difficult to get circular shape/flat top/ same shape/ two shapes not the same because of groove in 100 g mass	use a mould/ use a plane surface to press down on plasticine	use rubber masses
D	pivot/100 g mass moved while x_2 being determined	method of securing 100 g mass to rule/ rubber pivot	fix pivot and ruler
E	oscillation not in one plane only		
F	difficult to determine end/start of oscillation/ difficult to turn through 90° each time	use of (fiducial) marker(s)/ video with timer	use a protractor

[Total: 20]
