MARK SCHEME for the May/June 2014 series

9700 BIOLOGY

9700/34

Paper 34 (Advanced Practical Skills 2), maximum raw mark 40

This mark scheme is published as an aid to teachers and candidates, to indicate the requirements of the examination. It shows the basis on which Examiners were instructed to award marks. It does not indicate the details of the discussions that took place at an Examiners' meeting before marking began, which would have considered the acceptability of alternative answers.

Mark schemes should be read in conjunction with the question paper and the Principal Examiner Report for Teachers.

Cambridge will not enter into discussions about these mark schemes.

Cambridge is publishing the mark schemes for the May/June 2014 series for most IGCSE, GCE Advanced Level and Advanced Subsidiary Level components and some Ordinary Level components.

Page 2	Mark Scheme	Syllabus	Paper
	GCE AS LEVEL – May/June 2014	9700	34

Mark scheme abbreviations:

; / R A AW	separates marking points alternative answers for the same point reject accept (for answers correctly cued by the question, or by extra guidance) alternative wording (where responses vary more than usual)
underline	actual word given must be used by candidate (grammatical variants accepted)
max	indicates the maximum number of marks that can be given
ora	or reverse argument
mp	marking point (with relevant number)
ecf	error carried forward
I	ignore

			GCE AS LEVEL – May/June 2014	9700	34
1	(a) (i)) idea	of increase;		[1]
	(ii)) state	ed volume or same volume of sample or starch + syring	ge;	[1]
	(iii)) two	levels drawn and labelled with 'before' ; + 'after' + water level af	ter lower than be	fore ;
		lowe	est level still covers contents of Visking tubing;		[2]
	(iv)) state	ed volume or same volume of sample or starch + syring	ge;	[1]
	(v)) all c	olumns separated by a line + all headings underlined ;		
		(top	or left of data) <u>time (/) min(</u> utes) ; + (any column / row headed) <u>vol(</u> ume) of <u>ioc</u>	<u>line or l cm³</u> or <u>ml</u>	(s);
		reco	ords results at four times (0, 5, 10, 15);		
		reco	ords a value for 5 minutes that is lower than the rest;		
		all v	alues to one decimal place ;		[5]
	(vi)) cheo	ck results against answer to (a)(i) must show agreeme	nt;	[1]
	(vii)) idea	of serial dilution or simple dilution (of 1%) ;		
		use	graph to find % concentration ;		[2]
	(viii)		nge or stopwatch + no effect + if use same syringe or s	topwatch	
		or idea	of different syringe used + systematic error + not true	value ;	[max 1]
	(b) (i)	•	axis) <u>vol(</u> ume) of <u>iodine</u> (/) <u>cm³</u> –axis) <u>percent(</u> age) or % of <u>starch</u> <u>reacted</u> (with iodine	solution);	
		•	axis) 0.5 to 2 cm labelled each 2 cm except origin and 3 –axis) 20 to 2 cm labelled each 2 cm except origin and		
		corr	ect plotting of five points as small cross or dot in circle	or cross ;	
		five or	plots + ruled sharp lines exactly point to point		
			d line of best fit + sharp smooth line ;		[max 4]
	(ii)) corr	ect estimation from graph by shown extrapolation ;		[1]
	(iii)		idea of too much ascorbic acid then iodine may not stain		
		or idea	of having to add more iodine in order to observe colou	ır;	
		nee	d to know how much ascorbic acid in plant tissues to m	ake test accurate	e; [max 2]

		GCE AS LEVEL – May/June 2014	9700	34
(iv)	or	3 cm ³ or more of iodine or more iodine, or excess iodin volume given in (b)(ii) or more ;	e	[max 1]
				[Total: 22]
2 (a) (i)		ast 3 enclosed areas + size 40 mm across largest encl arp continuous line + no shading ;	osed area at wid	lest point
	-	three complete enclosed areas ich enclosed area touching at least one other enclosed	area ;	
	nucleus drawn + membrane no more than twice the width of the nucleus;			
	uses	s label line + label to only one nucleus ;		[4]
(ii)	corre	ect label line to the surface of the alveoli;		[1]
(iii)	air s	pace/large surface area/wall one cell thick/thin alveo	lar wall ;	
	diffu	sion or idea of more efficient gas exchange ;		[2]
(b) (i)	Z to	closed guard cells ;		
	idea	of stomata/guard cell/air space(s) + closed + reduces diffusion of water or	reduces evapora	ation; [2]
(ii)) at least whole 5 cells + size of the largest cell at its largest dimension at least 50 mm + no ruled lines + no shading ;			
	draws only whole cells within the boundary + at least five cells ;			
	length of stomatal gap is the same or shorter than the length of the guard cell on the			cell on the righ
	shov	ws inclusions in the three largest cells ;		
	corre	ectly labelled with label line to only one guard cell ;		[5]
(iii)	mea	sures scale bar to 22 + mm + to within 1 mm ;		
	(A) s or	shows conversion of scale bar in mm to μ m (× 1000)		
		shows conversion of 54 μm to mm (54 divided by 1000	= 0.054 mm) ;	
		show measurement of scale bar in μm divided by 54 μr	n	
	or (B) s	shows measurement of scale bar in mm divided by 0.0	54 mm;	
	(A) a	and (B) rounds answer to a whole number;		г л ^а
				[4]

[Total: 18]
