## MARK SCHEME for the October/November 2010 question paper

## for the guidance of teachers

## 9702 PHYSICS

9702/35

Paper 31 (Advanced Practical Skills 1), maximum raw mark 40

This mark scheme is published as an aid to teachers and candidates, to indicate the requirements of the examination. It shows the basis on which Examiners were instructed to award marks. It does not indicate the details of the discussions that took place at an Examiners' meeting before marking began, which would have considered the acceptability of alternative answers.

Mark schemes must be read in conjunction with the question papers and the report on the examination.

• CIE will not enter into discussions or correspondence in connection with these mark schemes.

CIE is publishing the mark schemes for the October/November 2010 question papers for most IGCSE, GCE Advanced Level and Advanced Subsidiary Level syllabuses and some Ordinary Level syllabuses.

	Page 2			Mark Scheme: Teachers' version	Syllabus	Paper	
				GCE AS/A LEVEL – October/November 2010	9702	35	
1	(a)	(i)		e of <i>d</i> to the nearest 0.01 mm or 0.001 mm with consis < <i>d</i> < 0.60 mm.	stent unit.	[1]	
	(b)	(iii)		e of $x$ in range 40 cm–60 cm with consistent unit. e of $I$ with units.		[1]	
	(c)	(c) Six sets of readings of x and I scores 5 marks, five sets scores 4 marks etc. In trend then $-1$ . Minor help from supervisor $-1$ ; major help from supervisor $-2$		Incorrect [5]			
		Rai x <sub>ma:</sub>	•	cm; x <sub>min</sub> < 30 cm		[1]	
		Eac The	ch col ere m	headings umn heading must contain a quantity and a unit. ust be some distinguishing mark between the quantity is expected but accept, for example, 1/ <i>I</i> (A <sup>-1</sup> ). Do not a		[1]	
				ncy of presentation of <u>raw</u> readings. s of <i>x</i> must be given to the nearest mm.		[1]	
		S.F	. in 1	nt figures / <i>I</i> must be the same as, or one more than, the lea sed in raw <i>I</i> .	st number of s	[1] ignificant	
			culati rrect c	on calculation of 1/ <i>I</i> .		[1]

## (e) Identifying limitations (4 marks) and suggesting improvements (4 marks)

	(i) Limitations [4]	(ii) Improvements [4]	Do not credit
A	Two readings are not enough (to draw a conclusion.	Take more readings and plot a graph/calculate more <i>k</i> values (and compare).	Few readings. Take more readings and calculate average. Only one reading.
В	Difficult to balance <u>with</u> <u>reason</u> e.g. unstable or effect of fans/draughts/a.c.	Drill hole higher up/switch off fans/a.c./close windows.	Closed room.
С	Difficult to <u>judge</u> when wooden strip horizontal/parallel (to the bench).	<u>Method</u> of ensuring strip is horizontal/parallel to bench e.g. use a spirit level or metre rule(s) to measure height of both ends/sight against window. Allow <u>detailed</u> use of set square.	Strip not straight/parallel/ horizontal. Use set square.
D	Difficult keeping <i>x</i> constant/ weights move.	Method of fixing cotton loop to rule e.g. tape, glue.	
E	Difficult to measure θ <u>because</u> hard to judge vertical/movement of hand.	Use a plumb line/clamped ruler/clamp protractor.	Bigger protractor. Paper behind protractor.
F	<u>Friction</u> at pulley/between nail and wooden strip.	Use lubricant/method of reducing friction.	Friction. Better pulley/ smooth(er) string/thin(ner) string. Friction between string and pulley. Lubrication between string and pulley.
G	Mass (values) not accurate.	Use balance/method of weighing mass.	Weigh masses.

Do not credit 'parallax problems', 'use assistant' or references to sensors, computers or videos.
