

Hormonal Coordination in Humans

Question Paper 1

Level	GCSE (9-1)
Subject	Biology
Exam Board	AQA
Topic	4.5 Homeostasis and Response
Sub-Topic	Hormonal Coordination in Humans
Difficulty Level	Bronze Level
Booklet	Question Paper 1

Time Allowed: 57 minutes

Score: /57

Percentage: /100

Q1. Humans control their internal environment in many ways.

Look at the diagram below.

(a) Name organ **A**.

.....

(1)

(b) Organ **A** stores glucose.

People with Type 1 diabetes cannot effectively control the levels of glucose in their blood.

Name the **hormone** people with **Type 1 diabetes** have to inject to decrease their blood glucose level.

.....

(1)

(c) Which organ produces urine?

Tick **one** box.

Brain

Lungs

Q2. The diagram shows some of the organs of the human body.

- (a) Which organ labelled on the diagram:
- (i) produces urine (1)
 - (ii) stores urine (1)
 - (iii) produces urea (1)
 - (iv) gets rid of carbon dioxide (1)
 - (v) helps to control body temperature? (1)

(b) **Bar chart 1** shows the volume of water the human body gains each day.

(i) Calculate the total volume of water the body gains each day.

.....

.....

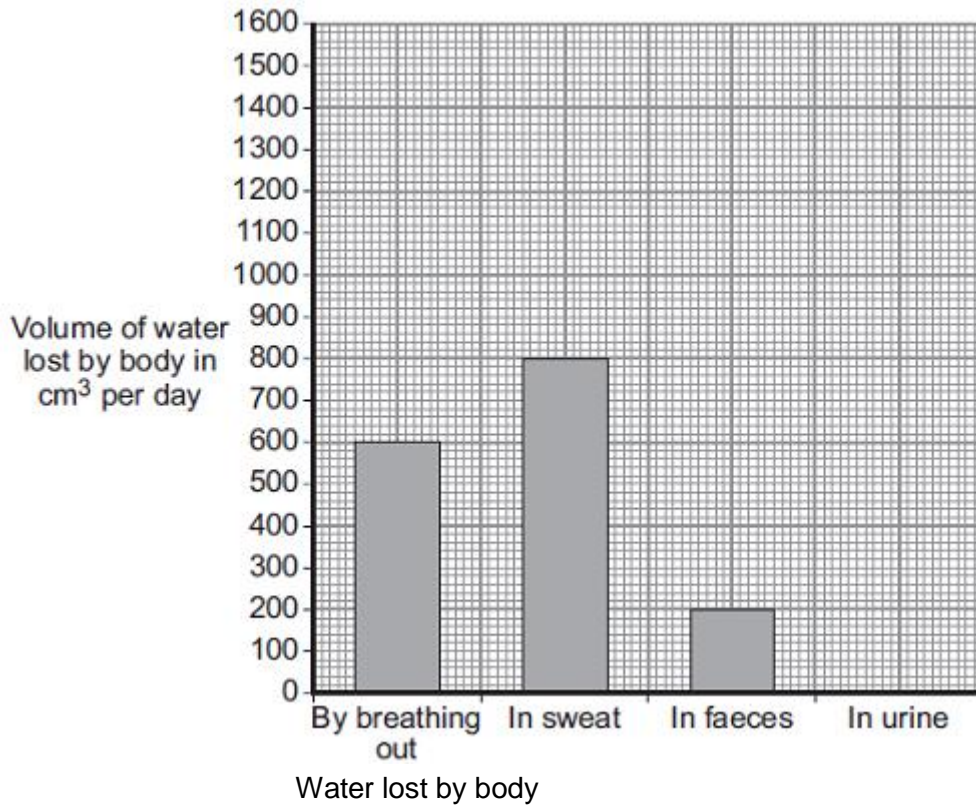

.....

Total volume of water gained = cm³

(2)

Bar chart 2 shows the volume of water lost each day by breathing out, in sweat and in faeces.

Bar chart 2

- (ii) Calculate the total volume of water lost each day by breathing out, in sweat and in faeces.

.....

Volume = cm³

(1)

- (iii) The volume of water the body loses must balance the volume of water the body gains.

Use your answers to part (b)(i) and part (b)(ii) to calculate the volume of water lost in urine.

.....

Volume of water lost in urine = cm₃

(1)

Save My Exams! – The Home of Revision

(iv) Plot your answer to part (b)(iii) on **Bar chart 2**.

(1)

(v) After taking some types of recreational drugs, the kidneys produce very little urine.

What happens to the body cells if the kidneys produce very little urine?

.....

.....

(1)

(Total 11 marks)

Q3. People with kidney disease may be treated by dialysis.

The diagram shows a dialysis machine.

(a) Draw a ring around the correct answer to complete each sentence.

A person loses mass during dialysis. One patient lost 2.2 kilograms during a dialysis session.

(i) This person lost mass mainly because

- | |
|-------|
| salt |
| urea |
| water |

was removed from the blood.

(1)

(ii) This substance was able to pass through the partially permeable membranes

because its molecules are

- | |
|--------|
| large. |
| round. |
| small. |

(1)

Save My Exams! – The Home of Revision

(iii) The concentration of sodium ions at X is 3.15 grams per dm³.

At the end of a dialysis session, the most likely concentration of sodium ions

at Y would be

0.00
3.15
6.30

grams per dm³.

(1)

(b) The table shows the cost, in the UK, of treating one patient who has kidney disease.

Treatment	Cost per year in pounds
Dialysis	30 000
Kidney transplant: operation + first year's medical care medical care in each further year	51 000 5 000

(i) During the first year, dialysis treatment is cheaper than a kidney transplant.

How much cheaper is the dialysis treatment? pounds

(1)

(ii) After some time, the cost of treating a patient by a transplant operation would be cheaper than continual treatment by dialysis.

How many years would it take?

Draw a ring around **one** answer.

2 years

3 years

4 years

Q4. Diabetes is a disease in which the concentration of glucose in a person's blood may rise to fatally high levels.

Insulin controls the concentration of glucose in the blood.

(a) Where is insulin produced?

Draw a ring around **one** answer.

gall bladder

liver

pancreas

(1)

(b) People with diabetes may control their blood glucose by injecting insulin.

(i) If insulin is taken by mouth, it is digested in the stomach.

What type of substance is insulin?

Draw a ring around **one** answer.

carbohydrate

fat

protein

(1)

(ii) Apart from using insulin, give **one** other way people with diabetes may reduce their blood glucose.

.....

(1)

(c) The bar chart shows the number of people with diabetes in different age groups in the UK.

Save My Exams! – The Home of Revision

Q5. The body controls internal conditions.

(a) Use words from the box to complete the sentences about water loss from the body.

kidneys	liver	lungs	skin
---------	-------	-------	------

(i) Water is lost in sweat via the

(1)

(ii) Water is lost in urine via the

(1)

(iii) Water is lost in the breath via the

(1)

(b) Students investigated body temperature in the class.

The bar chart shows the results.

(i) One student used the bar chart to calculate the mean body temperature of the class.

Save My Exams! – The Home of Revision

For more awesome GCSE and A level resources, visit us at www.savemyexams.co.uk

The student calculated the mean body temperature as 37.0 °C.

How did the student use the bar chart to calculate the mean?

.....
.....
.....
.....

(2)

(ii) How many students had a body temperature higher than the mean of 37.0 °C

.....

(1)

(iii) Body temperature must be kept within a narrow range.

Why?

.....
.....

(1)

(Total 7 marks)

Q6. Human body temperature must be kept within narrow limits.

The image shows a cyclist in a race.

© Ljupco/iStock/Thinkstock

(a) Use the correct answer from the box to complete each sentence.

blood	brain	kidney	sweat	urine
-------	-------	--------	-------	-------

The cyclist's body temperature is monitored by a centre in the

This centre is sensitive to the temperature of the cyclist's

If the cyclist's body temperature increases, his body increases

the production of

(3)

(b) (i) Cyclists drink sports drinks after a race.

The table below shows the ratio of glucose to ions in three sports drinks, **A**, **B** and **C**.

	Sports drink		
	A	B	C
Ratio of glucose (g per dm ³) to ions (mg per dm ³)	15:14	12:1	2:7

Save My Exams! – The Home of Revision

For more awesome GCSE and A level resources, visit us at www.savemyexams.co.uk

The closer this ratio of glucose to ions is to 1:1 in a sports drink, the faster the body replaces water.

Which sports drink, **A**, **B** or **C**, would replace water fastest in an athlete?

(1)

(ii) Why should sports drinks contain ions?

.....

.....

(1)

(iii) Why should a person with diabetes **not** drink too much sports drink?

.....

.....

Q7. Blood glucose concentration in humans must be kept between 4.4 and 6.1 mmol per dm³.

Four students, **A, B, C** and **D**, tested their blood glucose concentration with glucose testing strips.

The diagram shows the results of their tests and the key from the test strip bottle.

(a) (i) Which student, **A, B, C** or **D**, has diabetes and has eaten a large piece of cake?

(1)

(ii) Which student, **A, B, C** or **D**, is in most need of eating carbohydrates?

(1)

(iii) Which student, **A, B, C** or **D**, has a healthy blood glucose concentration?

(1)

(b) (i) Name the hormone that people with diabetes inject to prevent their blood glucose concentration from becoming too high.

.....

(1)

(ii) Blood glucose concentration is monitored in the body.

Save My Exams! – The Home of Revision

Q8. Glands in the body produce hormones.

(a) Use words from the box to label gland **A** and gland **B** on the diagram below.

Adrenal	Pancreas	Pituitary	Testis	Thyroid
---------	----------	-----------	--------	---------

(2)

(b) Which gland produces oestrogen?

Tick **one** box.

Ovary

Pancreas

Testis

Thyroid

(1)

(c) **Table 1** shows some methods of contraception.

Table 1

Type of contraception	Percentage (%) of pregnancies prevented
Oral pill	>99
Implant	99
Condom	98
Diaphragm	<96

Which method of contraception in **Table 1** is **least** effective at preventing pregnancy?

.....

(1)

(d) Which method of contraception in **Table 1** will protect against sexually transmitted diseases like HIV?

.....

(1)

(e) Another method of contraception is called the intrauterine device (IUD).

There are two main types of IUD:

- copper
- plastic.

Both types of IUD are more than 99% effective.

Look at **Table 2**.

Table 2

	Copper IUD	Plastic IUD
How the IUD works	<ul style="list-style-type: none"> • releases copper • copper changes the fluids in the uterus to kill sperm 	<ul style="list-style-type: none"> • releases a hormone • hormone thickens mucus from the cervix so the sperm have more difficulty swimming to the egg

Save My Exams! – The Home of Revision
